**T-Slotted Aluminum Profile Compatibility Code\***

How to find parts compatible with the T-slotted profile you are currently using:

1. Not all T-slotted profiles are created equal. Not only are there numerous outside dimensions, fractional and metric, but there are also differences in T-slot dimensions. The opening of the slot is the critical dimension when determining part/profile compatibility.
2. Certain fasteners, parts and accessories are designed to work with only one particular slot dimension, while others are compatible with more than one slot size.
3. Series designations such as 10, 15, 20, 25, 30, 40, 45 etc. refer to overall outside dimensions of the profile and/or center-to-center dimensions of two T-slots.
4. The critical slot opening dimensions mentioned above are stated in millimeters. They include openings of 5, 6, 8, 10, 11 and 12 mm.

5. To determine compatibility the slot opening and profile series must be known. This will establish the compatibility code, which is listed for every part.

**Introduction to Hinges**  
Design & Assembly Tips, Tricks and Recommendations

Our **Hinges**, standard and lift-off, may be used in various applications. The following highlights of hinge features will assist you in proper selection and use. Plastic lift-off hinges are available in **left** and **right** positions.

**Left** – Pin on the left, door opens right to left

**Right** – Pin on the right, door opens left to right

**Tip:** Using all right or all left hinges will allow the door to lift off

**Tip:** Mixing right and left hinges on one side will captivate the door

**Recommendation:**

Select hinges with the **Slot Tabs or Slot Pins** compatible with the T-Slot profile. Slot Tabs/Pins prevent the hinge from rotating and increase its load bearing capacity.

Slot Tabs/Slot Pins may be removed or broken off when, for example, a panel is being mounted.

Slot Tab (Slot Pin)

**Introduction to Hinges** *continued*  
Design & Assembly Tips, Tricks and Recommendations

**Trick: Transition Hinges**

Notice the Plastic Hinges listed on pages 359-360 have two common dimensions; leaf thickness and hinge height. This feature allows **Plastic Lift Off Hinge** leaf sizes to be interchanged, creating a transition for hinging different sizes of T-slot profiles or panels. The same position hinges must be used, i.e. two lefts or two rights.

A **5.00mm** gap is commonly created when hinging together two T-slotted profiles.

**Bolt Kits**

The recommended bolt kits listed with hinges are for mounting that hinge to a specific T-slotted profile or panel. For more bolt kit options, refer to Fractional or Metric Section 3.

**Legend for Icons**

This part is **10 Series compatible**

This part can use **double economy T-nuts** (see bolt kit table P on page 268)

Design files for this part can be found on the **80/20® DVD (Design Software)**

This part can use **triple economy T-nuts** (see bolt kit table Q on page 268)

**How to Order 80/20® Panels & Door Components**

With the wide selection of 80/20 panels and door components available, it is important to take special care to include all required information when ordering. See the following page for a list of ordering requirements that will speed up your order process and help us better meet your needs. And remember, there is always an 80/20 specialist available in your area to help with any design, ordering, or assembly questions you may have.

**Calculate Panel Area**

Since all panels are sold by the square foot, the most important step when ordering panels from 80/20® is calculating the panel's area. To round up your specific panel size, refer to the quick reference panel size chart on page 330.

**Example:** 14" (Length) x 31" (Width) Rounded Up To 18" (Length) x 36" (Width)  
  
18" x 36" = 4.50 Sq. Ft.

**Specifying Machining On A Drawing**

When submitting a panel drawing, please place a call out letter on each corner of your panel. Notice in the example at right that the width and length are referenced by their specified call outs.

Beginning with the upper left corner, call outs are designated A, B, C, and D in a counterclockwise direction. Referencing these call outs when ordering machining allows for proper measuring of the service position.

In this example the service center line is measured down from the "A" call out.

**Ordering Example:**  
2609 (1) @ (AD) 36.000" x (AB) 24.000"  
w/ 7313 on Side AB @ 12.000"

**Panel Sizing Tip**

When sizing a panel that will be inserted into a profile's T-slot be sure to add extra material to your visible panel size.

**Example:**

All four sides of the panel will recess inside the 10 Series profile's T-slot. The visible size of the panel will be 24" x 24"; we add .50" to the "A" dimension of the panel that will recess into the T-slot. Our total panel size will now be 24.5" x 24.5"

Add .50" to "A" for 10 Series  
Add .75" to "A" for 15 Series

**Lift-Off Hinges**

- 10 and 15 Series compatible
- All required fasteners included
- Hinge body made of 6105-T5 anodized aluminum with permanently lubricated bronze bushings
- Heavy-duty stainless steel hinge pins provide strength, long life, and smooth operation
- Captivated nylon thrust washer eliminates metal-to-metal contact and won't fall out
- Positioning long pin in upper position simplifies door assembly

☒ = 10 Series Compatible Part

**Note:** Position the long pin in the upper position to simplify door assembly.

**Note:** The distance of the gap between the two mating profiles will equal .063" for 10 Series, 15 Series and transitions of both Series.

Recommended Mounting Hardware (Mount to Profile):

Part No.	Qty	Description
3035	2	M6 x 20mm SHCS & Economy T-Nut

**Fractional**

**Offset Handle**

- 10 and 15 Series compatible
- All mounting hardware included – Part No. 3065 (2), 3063 (2), and 3382 (2)
- Corrosion-resistant handles made of fiber reinforced technopolymer
- Bolt directly onto T-slotted profiles – ideal for bi-fold doors
- One side is solid, preventing finger-pinch injuries
- Orange snap-on cover hides mounting screws

Part No.	A	B	C	D	E	F	G	H	Lbs.
2079	5.120	4.290	3.460	ø.256	1.730	.940	.953	.585	.210

**Flush Handles**

- Two sizes available
- Mounts in panels 1/4" or less thick
- All mounting hardware included
- Housings made of black polymer
- 2056 handle pull made of black polymer
- 2058 handle pull made of black powder-coated aluminum
- See page 596 for panel machining service

Part No.	Size	A	B	C	D	E	F	G	H	J	K	L	M	Lbs.

**Slam Latch**

Die-Cast Zinc, Black Powder Coat

- Low-profile slam latch mounts to T-slot door and frame from the back
- Four M6 T-nuts (supplied) placed in slots on back of latch
- Four thru holes required. See page 572 for machining service information
- Call out machining service(s) and mounting bolts for the profile series you are using

Part No.	Lock	A	B	C	D	E	F	G	H	Lbs.	Compatibility Code*

Grabber™ Door Catch is a registered trademark of Southco, Inc.

**Grabber™ Door Catch Mounting Plates**

- 10 and 15 Series compatible
- Made of 1/4” 6105-T5 clear anodized aluminum
- Securely mounts Grabber™ door catch onto T-slotted profile
- Notching and drilling services required for mounting to plastic panels – see page 594

**2121**

Aligns keeper with Door Track P/N 2210 and 2220 shown on page 299. Mounts to 15 Series T-slots.

**2122**

Aligns keeper with Door Track P/N 2211 and 2221 shown on page 299. Mounts to 10 Series T-slots.

**2123**

Mounts catch to 10 or 15 Series T-slots. Provides adjustment for flush closure of hinged plastic panels up to 1/4” thick.

Part No.	Series	Plate Type	Lbs.

**Tension Ball Latch**

- 15 Series compatible
- All mounting hardware included – (4) 1/4-20 x .500 SHCS & Economy T-Nut
- Latch and striker are zinc alloy with chrome finish; mounting plate is clear anodized aluminum
- Striker can enter adjustable latch from either front or side; latch tension adjusts with two spring-loaded screws
- Medium to heavy-duty latch for swinging or sliding door

Part No.	Push In Force	Pulling Force	A	B	C	D	E	Lbs.
2134	9.400 Lbs.	7.200 Lbs.	1.500	4.000	3.500	2.760	.257	.446

**Hinge Door Configuration**

- Mount latch to angle bracket
- Mount strike to flat plate

**Sliding Door Configuration**

- Mount latch to flat bracket
- Mount strike to angle plate

**Sliding Door Lock**

- Locks 1/4" thick sliding panels when used with sliding door track shown on page 401
- Economical security lock ideal for storage or display cases
- Attractive chrome finish

Part No.	A	B	C	D	E	F	Lbs.
2057	5.625	1.125	4.437	.580	.980	.800	.200

**Sliding Door Glide**

- 10 and 15 Series compatible
- Includes stainless steel mounting screw
- Made from UHMW polyethylene
- Bolts onto the profile end and freely rotates as door pivots
- See pg 606-607 for bi-fold door information
- See pg 523-525 for UHMW material specifications

2220	Lower	145.000"	.154	.400	.275	1.125	.264

Note: To calculate the panel height, subtract .500" from dimension N.

☒ = 10 Series Compatible Part

**Panel Stiffeners**

- Add rigidity to large 1/4" thick plastic panels
- Made of 6105-T5 clear anodized aluminum
- Stock length is 72.5"; for lengths other than 72.5", see page 116
- Use a soft face mallet to apply this profile to the panel; see page 558

Part No.	Handle	A	B	C	D	E	F	Lbs.
2429	Yes	.420	.240	.710	.600	.181	.950	1.710
2424	No	.420	.240	.710	.600	.181	-	1.470

**Panel Gasket – 15 Series**

- 15 Series compatible
- Made of high density black polyethylene (HDPE)
- Stock length: 72.5"
- Inserts into the T-slot from the top or end to securely hold plastic panels (.240")
- Panel machining service No. 7500 or 7501, an edge radius, makes assembly easier – see page 592

Part No.	Description	Lbs.
2120	Black 15 Series Panel Gasket	.100

**Note:** To calculate the panel width, add .750" to dimension A.

**Rubber Panel Gasket** 

- 10 and 15 Series compatible
- Holds .188" thick panels secure in 10 Series  
Holds .236" thick panels secure in 15 Series
- Available in black
- Black rubber panel gasket can be ordered by the foot or in 150 ft. rolls

Part No.	Slot	B	C	Description	Lbs.
2116 	6	4.50	10.00	Rubber Panel Gasket (Per Foot)	.0150 Lbs. / ft.
2118 	6	4.50	10.00	Rubber Panel Gasket (Per 150 Foot Roll)	2.250 Lbs. / roll

2117	8	6.10	14.60	Rubber Panel Gasket (Per 150 Foot Roll)	3.750 Lbs. / roll

**Note:** To calculate the panel width for 10 Series, add .500" to dimension "A".  
To calculate the panel width for 15 Series, add .750" to dimension "A".

 = 10 Series Compatible Part

**Silicone Rubber Panel Gasket** 

- 10 and 15 Series compatible
- Holds plastic panels tight in the T-slot; easily inserted after the panel is placed in the frame
- Made of gray silicone rubber for improved chemical and heat resistance; panel gasket only needs to be inserted on one side
- Holds .188" thick panels secure in 10 Series  
Holds .236" thick panels secure in 15 Series
- Order by the foot

Part No.	Description	Lbs. / Ft.
2177 	Silicone Rubber Panel Gasket (Per Foot)	.020
2178	Silicone Rubber Panel Gasket (Per Foot)	.030

**Note:** To calculate the panel width for 10 Series, add .500" to dimension "A".  
To calculate the panel width for 15 Series, add .750" to dimension "A".

 = 10 Series Compatible Part

**Rubber Door Seal**

- Use with 15 Series profiles only
- Black EPDM door seal presses into the T-slot
- Minimum .250" gap between the door and frame
- Sold by the foot or in 100 foot rolls

Part No.	Unit Sold	A	B	C	D	Lbs.
2829	Per Foot	.250	.750	.310	.340	.128 Lbs. / ft.
2834	Per 100 Ft. Roll	.250	.750	.310	.340	12.800 Lbs. / Roll

**Panel Mount Blocks**

- 10 and 15 Series compatible
- Hardware for mounting block to T-slot included
- Made of 6105-T5 clear anodized aluminum
- Firmly mount plastic panels flush or offset
- Simplifies adding or removal of plastic panels
- See page 600 for panel machining services

2425 Shown

Recommended Mounting Hardware (Mount to 1/4" Panel):

**Spacer for Panel Mount Block**  
Fiberglass-Reinforced Nylon, Black

- Sold individually
- Compatible with the plastic panel mount blocks shown in this section
- Three thicknesses available

Part No.	Spacer Thickness	Lbs.	Comments
12051	.079	.00	Works with panel mount blocks shown on pages 307-309
12053	.118	.00	
12055	.197	.00	

\* See Compatibility Code information on page 351.

**Quick Change Panel Clamp**

- Use with 15 Series only
- Mounts panels up to 1/4" thick with no machining or hardware required
- Made of high strength black nylon
- 1/4" turn locks the block on the T-slot
- Easily remove the panel clip with a flat tip screwdriver

Part No.	Description	A	B	C	D	E	F	Lbs.
2421	Complete Set (Block & Clip)	.775	.640	.980	.785	.870	.920	.018

2423	Panel Clip	-	-	.980	.785	.870	-	.004

**Note:** To calculate the panel height, subtract .450" from dimension N.

**Drop-In Panel Bracket**

- 10 and 15 Series compatible
- No fasteners or machining required for mounting to T-slot
- Made of 6105-T5 clear anodized aluminum
- Bracket can be loaded from face of the T-slot
- Mounts panel flush with outside of 10 or 15 Series profiles

2608	Lucite® / Acrylite®	Bronze	.177"	.840	48" x 96" + .500 - 0

Acrylic panels are a cost-effective alternative to polycarbonate. While less impact-resistant, acrylic is lighter in weight and available in more colors. Acrylic is great in applications where optical clarity and resistance to the elements are important. Only half as heavy as glass and only 40% as heavy as aluminum, acrylic is also easy to cut, drill, rout and paint. Use acrylic for applications such as displays, signs, furniture, low-impact guarding and partitions.

**AR Polycarbonate Panels**

- Abrasion-resistant coating
- High impact resistance
- Stable up to 240°
- Good visual transparency
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2641	Makrolon® AR	Clear	.177"	1.150	48" x 96" + .875 - 0
2642	Makrolon® AR	Clear	.220 - .236"	1.500	48" x 96" + .875 - 0

AR Polycarbonate is a standard polycarbonate panel with an abrasion-resistant coating. This hard coat surface gives a durable, impact-resistant polycarbonate panel the wearability of an acrylic sheet. AR Polycarbonate can be used to maintain a clear view of an enclosed operation on machine guards and other safety applications in high traffic areas.

### Polycarbonate Panels

- Easily machinable
- Good optical clarity
- High impact resistance
- Stable up to 240°
- Now available in .118", .375" and .500" thickness
- Cut plastic panels to size with 7150 or 7155 services on page 583 (for .375 and .500 thick panels, use 7151 or 7153 services)
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size

\* Specify sheet size when ordering

Polycarbonate is a high performance industrial application panel. Easily machined with standard hand tools, the high impact resistance offered by polycarbonate prevents cracking, chipping or breaking when cutting or drilling panels. Polycarbonate is best used in applications where high impact resistance is needed while offering a clear view of the enclosed device. Polycarbonate excels in industrial and manufacturing applications such as machine guards, equipment enclosures and workstations.

### ABS Haircell Panels

- Lightweight
- Textured side hides marks and scratches
- Cost-effective
- Stable up to 180°
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2613	-	Black	.236"	1.700	54" x 103" + .875 - 0
2614	-	Black	.177"	1.000	48" x 96" + .875 - 0

ABS Haircell is a great cost-effective alternative to acrylic and polycarbonate. ABS Haircell has a unique textured side, which hides scratches and other marks while offering greater impact resistance than acrylic panels. Easily machined, ABS Haircell is a general purpose sheet that is well suited to almost any application, including furniture, workstations, displays, guarding and partitions.

### Kydex® Panels

- Impact-resistant panel
- Fire rated UL 94 V-O
- Textured finish on front of panel hides marks and scratches
- Available in black or yellow
- Stable up to 160°

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2660	Kydex®	Black	.187"	1.150	48" x 96" + .375 - 0
2661	Kydex®	Black	.250"	1.500	48" x 96" + .375 - 0
2662	Kydex®	Yellow	.187"	1.150	48" x 96" + .375 - 0
2663	Kydex®	Yellow	.250"	1.500	48" x 96" + .375 - 0

Kydex® is an impact-resistant sheet that features a colored cap with a similarly colored substrate. Textured on one side, this fire-retardant panel combines an aesthetic appearance with long service life.

## 80/20® Inc.

The Industrial Erector Set®  
THE STANDARD

### Expanded PVC Panels

- Low cost and lightweight
- Decorative applications can be designed using several of our available colors
- Stable up to 140°
- Good chemical resistance
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2615	Sintra® / Celtec®	White	.236"	.900	48" x 96" + .500 - 0

2624	Sintra® / Celtec®	Gray	.118"	.500	48" x 96" + .500 - 0
2631	Sintra® / Celtec®	Yellow	.236"	.900	48" x 96" + .500 - 0
2632	Sintra® / Celtec®	Yellow	.118"	.500	48" x 96" + .500 - 0

Expanded PVC panels, available in 6 colors, are a low cost alternative to Acrylic and Polycarbonate panels. Expanded PVC panels are very weather-resistant and easily machined. The light impact resistance limits the usage of Expanded PVC panels to light-duty applications where contact is a minimum. Expanded PVC works great as signage, displays or exhibit panels.

## Fractional

### Alucobest Panels

- Half the weight of solid aluminum, making machining easy
- Smooth metallic finish is impact-resistant
- Alucobest is durable and resistant to weather and elements
- Stable up to 175°
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2650	Alucobest	Platinum	.236"	1.490	50" x 122"

An aluminum composite material composed of two .020" aluminum skins bonded to a polyethylene core, Alucobest has a smooth metallic finish similar to that of a solid aluminum panel, with only half the weight. Offering good impact resistance, Alucobest also resists buckling and warping and is easily machined. When you need a strong, solid panel for guarding, enclosures, or workstations in place of a solid aluminum sheet, Alucobest is the answer.

### Alumalite® Panels

- Lightweight composite panel
- Smooth, glossy, painted finish
- Water-resistant core
- Stable up to 120°
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2633	Alumalite®	Blue	.236"	.625	48" x 96"
2634	Alumalite®	Red	.236"	.625	48" x 96"
2635	Alumalite®	Silver	.236"	.625	48" x 96"
2636	Alumalite®	Yellow	.236"	.625	48" x 96"

Alumalite®, a strong aluminum composite panel with a corrugated polyallomer core between two .016" aluminum skins, is a perfect choice for applications that require a lightweight, aesthetic looking panel. The CPA core provides Alumalite® weather-resistant properties that make this panel appropriate for indoor or outdoor applications including furniture, signs, displays, workstations and machine guarding.

### Twin Wall Polycarbonate Panels

- Lightweight
- 90% light transmission
- Resistant to weather and elements
- Twin walls
- Cut plastic panels to size with 7150 or 7155 services on page 583
- See pages 583-605 for all plastic panel machining services

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2640	-	Clear	.236"	.266	48" x 96"

Twin Wall Polycarbonate provides an excellent solution for a wide range of lightweight guarding, partition, and enclosure needs. At one-sixth the weight of a solid polycarbonate panel, Twin Wall Polycarbonate is quick and easy to work with.

Always specify the required direction for the channel orientation when ordering Twin Wall Polycarbonate panels.

## Fractional

### HDPE Panels

- Cost-effective decorative panel available in six colors
- Haircell-type texture on both sides
- More impact-resistant than expanded PVC panels
- Very good chemical resistance

Part No.	Trade Name	Color	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2651	-	Black	.220 - .236"	1.200	48" x 96"
2652	-	Black	.177"	.900	48" x 96"
2653	-	White	.220 - .236"	1.200	48" x 96"
2654	-	White	.177"	.900	48" x 96"
2655	-	Gray	.220 - .236"	1.200	48" x 96"
2656	-	Gray	.177"	.900	48" x 96"
2657	-	Yellow	.220 - .236"	1.200	48" x 96"
2658	-	Yellow	.177"	.900	48" x 96"
2666	-	Blue	.220 - .236"	1.200	48" x 96"
2667	-	Blue	.177"	.900	48" x 96"
2668	-	Red	.220 - .236"	1.200	48" x 96"
2669	-	Red	.177"	.900	48" x 96"

HDPE panels, available in six colors, are a great alternative to Expanded PVC panels. HDPE panels are weather-resistant and have excellent machining characteristics. With two textured sides, this panel is a great option in areas where both sides of the panel are exposed. HDPE has a high coefficient of thermal expansion. Allow panels to expand and contract by using oversized mounting holes, and not captivating the panel tightly in the T-slot.

**Solid Aluminum Plate**

- Unanodized mill finish
- Anodized parts quoted on request (CM)
- 6061-T6 alloy
- See page 608 for aluminum plate machining services

Part No.	Material	Thickness	Lbs. / Sq. Ft.	Stock Sheet Size
2452	Aluminum Plate	.060"	.889	48" x 144"
2453	Aluminum Plate	.125"	1.764	48" x 144"
2454	Aluminum Plate	.187"	2.680	48" x 144"
2455	Aluminum Plate	.250"	3.700	48" x 144"
2456	Aluminum Plate	.375"	5.550	48" x 144"

80/20® now offers solid aluminum, mill finish plate in five thicknesses. These aluminum sheets can be anodized and machined to meet your needs.

**Laminated Table Tops**

- Quality 1.25" high-pressure laminate table tops
- Perfect choice for completing your custom workstation
- Available in gray color
- 1/8" PVC bumper edge coordinates with table color
- See page 443 for tabletop fastening kit

Part No.	Size	Lbs.
2800	1.25" x 30" x 48"	50.000
2802	1.25" x 30" x 60"	63.000
2804	1.25" x 30" x 72"	75.000
2806	1.25" x 36" x 72"	90.000

**Fractional**

**Expanded Metal Panels**

- Heavy-duty panel
- Powder coat or carbon steel finish
- Stronger than welded wire cloth
- Impact resistant
- Shear expanded metal panels to size with 7095 or 7100 services on page 583

Part No.	Material	Type	Thickness	Lbs. / Sq. Ft.	Dimensions	Stock Sheet Size
2480	Carbon Steel	Flattened	.135"	1.720	Diamond 2" x .9"	48" x 96"
2481	Powder Coated Black	Flattened	.140"	1.720	Diamond 2" x .9"	48" x 96"
2482	Powder Coated Yellow	Flattened	.140"	1.720	Diamond 2" x .9"	48" x 96"

80/20®'s Expanded Metal Panels are the perfect choice for any heavy-duty guarding application. Available in a standard carbon steel finish, Expanded Metal is also stocked with a black or yellow powder coated finish. Expanded Metal surpasses wire mesh in strength and durability.

Horizontal Orientation

Always specify the required direction for the diamond orientation when ordering Expanded Metal Panels.

2464	Powder Coated Black	16	.137"	.580	Square .50" x .50"	48" x 96" +/- .50"

Welded Wire Mesh Panels are a great low cost alternative to expanded metal panels. While not as strong as expanded metal, their light weight makes working with Wire Mesh Panels quick and easy. Available in carbon steel and four powder coat colors, these Wire Mesh Panels work well for guarding and enclosure applications.

## Fractional

### PVC Coated Wire Mesh Panels

- Widely used in guarding and enclosure applications
- Strong yet lightweight
- Low wear value, won't flake or chip
- Light impact-resistant
- Corrosion resistant
- Shear wire mesh panels to size with 7095 or 7100 services on page 583

**NOW AVAILABLE  
IN 2" X 2"  
DIMENSIONS!**

Part No.	Material	Wire Gauge	Thickness	Lbs. / Sq. Ft.	Dimensions	Stock Sheet Size
2472	PVC Coated Carbon Steel Black	12	.210"	1.300	Square 1" x 1"	48" x 96" +/- .50"
2474	PVC Coated Carbon Steel Black	16	.140"	.650	Square .50" x .50"	48" x 96" +/- .50"
2478	PVC Coated Carbon Steel Black	12	.210"	1.300	Square 2" x 2"	48" x 96" +/- .50"
2473	PVC Coated Carbon Steel Yellow	12	.210"	1.300	Square 1" x 1"	48" x 96" +/- .50"
2475	PVC Coated Carbon Steel Yellow	16	.140"	.650	Square .50" x .50"	48" x 96" +/- .50"
2477	PVC Coated Carbon Steel Grey	12	.210"	1.300	Square 1" x 1"	48" x 96" +/- .50"
2476	PVC Coated Carbon Steel Grey	16	.140"	.650	Square .50" x .50"	48" x 96" +/- .50"

PVC Coated Wire Mesh is the low-cost alternative to powder coated wire and expanded metal. Available in three colors, the PVC coating creates a clean look for your application and prevents cuts and other injuries. PVC Wire Mesh Panels are great for use in guarding, enclosure and machine frame applications.

**THE STANDARD****Panel Area Calculation Chart**

Directions for area calculation:

- Round both length and width dimensions of the panel up to the next 6" increment.
- Find the length and width along the top and left side of area calculation chart.
- Find the area in square feet at the intersection of the length and width dimensions.
